SUMMARY

Full-stack Software Engineer specializing in .NET desktop applications with 3 years of hands-on experience developing production systems and crafting intuitive, user-focused interfaces.

EXPERIENCE

DataBlue S.A. | Full-stack Software Engineer

November 2023 - Present | Kallithea, Athens

Core developer responsible for **maintenance, feature development, and modernization** of a large-scale .NET desktop medical application.

Projects Delivered Independently:

- Designed and implemented an in-app emailing system that became a key commercial feature of the product.
- Designed and developed an in-app PDF template designer enabling users to create dynamic, form-based documents instead of relying on predefined templates.
- Engineered a custom patient-centric GridView system aggregating medical history data and significantly improving clinician workflow efficiency.
- Led comprehensive UI modernization across all application views, redesigning layouts and visual components to improve usability and consistency.

Other contributions:

- Delivered additional app related features and enhancements.
- Development and maintenance of the core Web API powering the app.
- Designed and implemented internal server APIs.
- Improved performance across existing app core functionalities.
- Performed database schema migrations and extensions.

Niro Technologies | Database Developer

October 2022 - November 2023 | Ag. Dimitrios, Athens

Developer responsible for SQL database development, data automation workflows, and maintenance and enhancement of a .NET-based CRM application.

VirtualNet | Computer Hardware Technician

March 2022 - October 2022 | Athens

Installation and configuration of embedded systems for automated parking solutions. Provided technical support for software and hardware issues, including diagnostics and troubleshooting. Assisted in debugging and maintaining system applications written in C/C++, C#, and Python.

Vodafone Group | Sales Advisor - Tech Expert

July 2020 - July 2021 | Athens

Assisted customers by identifying their needs and recommending suitable Vodafone products and services. Conducted troubleshooting repairs for smartphones, laptops, and other smart devices. Delivered high-quality technical support and maintained strong customer relationships in a fast-paced retail environment.
